PROFILE

Prompt Engineer and AI Developer with experience in Python, NLP, Generative AI, and AI-assisted application development. Skilled in creating structured prompts, optimizing LLM reasoning, and using AI tools to design, debug, and build applications. Developed multiple real-world systems in agriculture, billing automation, and trading analytics. Strong in problem solving, automation, and using AI to accelerate software development.

SKILLS

Languages Python, SQL, Dart, TypeScript	Frameworks & Libraries Flutter, Next.js, FastAPI, Flask, Supabase, TensorFlow
AI/ML NLP, Generative AI, Prompt Engineering, Agentic AI, Claude API	Developer Tools Git, GitHub, VS Code, Vercel
Databases Supabase, AWS, Cloudflare R2, Docker	Soft Skills Problem Solving, AI-Assisted Development, Team Collaboration

PROFESSIONAL EXPERIENCE

Software Developer <i>Crescent Moon Consulting Services</i>  Software Developer at Crescent Moon Consulting Services, contributing to AI-driven product development — building reporting pipelines, backend API systems, and AI service integrations for client and internal projects.	01/2026 – 03/2026 Erode, Tamil Nadu
Software Developer <i>ScableIndia Pvt. Ltd.</i> - Developed and maintained Flutter mobile apps using AI-assisted development workflows. - Enhanced UI/UX, fixed bugs, improved performance, and collaborated with cross functional teams.	Remote
Generative AI Intern <i>GU DataLogic</i> - Designed, optimized, and evaluated prompts for summarization, analysis, and automation tasks. - Improved LLM accuracy and consistency while contributing to AI-driven internal tools.	Remote

PROJECTS

Intelligent Trading System <i>AI-Powered Algorithmic Trading Platform Python, FastAPI, XGBoost, LSTM, PostgreSQL, Redis</i> - Engineered a multi-market platform (US, India, global) with an async FastAPI backend and ensemble ML models (XGBoost, LightGBM, CatBoost + LSTM) achieving 91.6% accuracy across 78+ indicators. - Implemented 5-layer risk management and real-time sentiment analysis (NewsAPI, Finnhub), with multi-channel alerting and dashboards (Streamlit, Plotly, Dash).	07/2025 – 12/2025
SoilMate <i>AI-Based Agricultural Decision Support System TensorFlow, scikit-learn, Flask, CNN, ANN</i> Developed 3 ML modules (ANN for crop recommendation, Random Forest for fertilizer prescription, CNN for disease detection) with explainable AI via Chain-of-Thought/Tree-of-Thought reasoning.	04/2025 – 06/2025

- Built a dual-interface system (Flask web app + CLI) integrating weather APIs and image processing for region-specific, confidence-ranked recommendations.

AgroConnect

01/2025 – 03/2025

Multi-Role Agricultural Ecosystem App | Flutter, Supabase, Hive, Provider

- Built cross-platform app connecting 5 stakeholder roles (farmers, workers, equipment holders, shop owners, buyers) with an offline-first architecture using Hive and Supabase sync.
- Implemented a role-based "honor score" rating system and transaction workflows for hiring, orders, and equipment rentals with Row-Level Security.

Trolley Bill Payment App

07/2024 – 10/2024

Flutter-Based Organic Grocery E-Commerce Application | Flutter, Hive, Razorpay, Google Sheets API

- Built cross-platform grocery app (Android, iOS, Windows, macOS, Linux) with barcode scanning, real-time cart calculation, and secure Hive-based authentication.
- Integrated Razorpay payment gateway, Telegram Bot order confirmations, and Google Sheets API for live inventory sync.

Kanavu Illam — Intelligent Architectural Visualization & Reporting Platform

01/2026 – 03/2026

Full Stack / Mobile Developer

- Built a cross-platform app that analyzes 2D floor plans using AI to generate Vastu compliance reports, structural analysis, and tiered cost estimations, with a custom Three.js/WebGL engine extruding plans into interactive, rotatable 3D models inside Flutter.
- Engineered a JS-to-Dart bridge for high-fidelity 3D canvas capture and an automated PDF reporting engine compiling AI-generated elevations, structural layouts, and 3D screenshots into a premium downloadable blueprint document.

EYES — AI-Powered Personal Digital Memory Platform

04/2026 – 06/2026

Full Stack Developer / Lead Engineer

- Architected a privacy-first platform aggregating a user's digital footprint (Gmail, Calendar, GitHub, Slack, Discord, Notion) into a searchable semantic memory index, with OAuth 2.0 pipelines for 10+ integrations and strict Row-Level Security for data isolation.
- Built a self-healing sync engine and Stripe-based billing/tiering system with webhook validation, alongside a real-time Next.js dashboard for sync status and an AI-guided chat interface.

PUBLICATIONS

Real-Time AI-Driven Cross-Market Trading System for Retail Traders Using XGBoost-LightGBM Ensembles

IEEE (or more specifically: IEEE IATMSI 2026 — International Conference on, presented at Gwalior)

Real-time AI trading system using XGBoost-LightGBM ensembles and LSTM for cross-market signal generation. Presented at IEEE IATMSI 2026, Gwalior; published on IEEE Xplore.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering

11/2022 – 06/2026

Velalar College of Engineering and Technology, Erode

Erode, Tamil Nadu

CGPA - 8

CERTIFICATES

Test Engineer | Infosys Foundation – Finishing School for Employability, ICT Academy

Jul 2025 – Aug 2025. Completed employability training in software testing methodologies, QA practices, and test automation frameworks.

Introduction to Internet of Things | NPTEL

Covered IoT fundamentals, sensor networks, communication protocols (MQTT, CoAP), and edge computing.

Generative AI Landscape | Wingspan

May 2025 Covered generative AI fundamentals, LLMs, prompt engineering, and AI application development.

Cloud Computing | NPTEL

Covered cloud service models (IaaS, PaaS, SaaS), virtualization, and deployment strategies.
